EXPERIENCE

Senior Software Development Engineer

Jan. 2026 – Present

Gunpowder Innovations

London, UK (Remote)

- Architected a zero-latency cashflow planning workspace in **React 19** and **Tailwind CSS 4**, running instant client-side math modeling alongside real-time server reconciliation.
- Engineered multi-tenant API services using **Bun**, **Express v5**, and **Neon Serverless Postgres** (Prisma 7), keeping financial data isolated across advisor accounts.
- Integrated **Plaid Open Banking** and **WealthKernel** custody APIs, automating live portfolio tracking and trade execution workflows.

Software Development Engineer

Jan. 2023 – Dec. 2025

The Internet Folks

Bhopal, MP (Remote)

- Built frontend monorepos in **Next.js 14 App Router** and **Turborepo**, extracting shared **@levo-so/*** React SDKs and edge routing middleware across 7 applications.
- Engineered a visual no-code form builder featuring a **redux-undo** canvas state machine and **TipTap** rich text editor, reducing form creation time from days to under 10 minutes.
- Built real-estate deal tracking dashboards (**@dnd-kit**) and **FullCalendar** timeline grids connected to **Microsoft Outlook**, speeding up team client responses by 40%.
- Optimized **MongoDB** database queries and added a **Redis** caching layer, cutting API response times by 30% while scaling services to 30,000+ active users with 99.9% uptime.

Software Development Intern

June 2022 – Aug. 2022

AUM Capital Market Private Limited

Kolkata, WB

- Built a **React.js** and **Node.js** app to automate government bond Yield-to-Maturity (YTM) calculations, replacing manual spreadsheets and cutting calculation effort by 80%.

PROJECTS

Fund Management & Form Builder Platform | **Next.js 14**, **Tailwind**, **TanStack Table**, **Recharts**

- Built high-performance data tables and analytics dashboards for fund managers to track NAV allocations, investor balances, and export CSV compliance reports with one click.

Multi-Modal Document AI Agent | **LangChain**, **Google Gemini**, **MongoDB**, **Socket.IO**

- Designed an AI search platform using **LangChain** and **Tesseract OCR** that answers questions from PDFs and images, with live **Socket.IO** WebSockets streaming responses.

TECHNICAL DETAILS

Frontend & UI: TypeScript, JavaScript, React 19, Next.js 14, Monorepos, Tailwind CSS, Ant Design, Chakra UI

Backend & Data: Node.js, Bun, Express v5, PostgreSQL (Prisma, Drizzle), MongoDB, Redis, ClickHouse, REST, GraphQL

DevOps & Tools: Docker, Turborepo, AWS (S3, SQS), Plaid API, WealthKernel, Stripe, Flatfile, TipTap, Git

EDUCATION & ACHIEVEMENTS

Bachelor of Technology in Computer Science (CGPA: 7.0)

Aug. 2018 – May 2022

University of Engineering and Management

Jaipur, RJ

- **Problem Solving:** Solved 500+ algorithmic problems across LeetCode and GeeksforGeeks.
